PORTABLE BANDSAW AND STAND MODEL G8692 INSTRUCTION MANUAL

COPYRIGHT © AUGUST 2003 BY GRIZZLY INDUSTRIAL, INC.

**WARNING: NO PORTION OF THIS MANUAL MAY BE REPRODUCED IN ANY SHAPE
OR FORM WITHOUT THE WRITTEN APPROVAL OF GRIZZLY INDUSTRIAL, INC.**

PRINTED IN CHINA

ONLINE MANUAL DISCLAIMER

THE INFORMATION IN THIS MANUAL REPRESENTS THE CONFIGURATION OF THE MACHINE AS IT IS CURRENTLY BEING SHIPPED. THE MACHINE CONFIGURATION CAN CHANGE AS PRODUCT IMPROVEMENTS ARE INCORPORATED. IF YOU OWN AN EARLIER VERSION OF THE MACHINE, THIS MANUAL MAY NOT EXACTLY DEPICT YOUR MACHINE. CONTACT CUSTOMER SERVICE IF YOU HAVE ANY QUESTIONS ABOUT DIFFERENCES. PREVIOUS VERSIONS ARE NOT AVAILABLE ONLINE.

WARNING

Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- Lead from lead-based paints.
- Crystalline silica from bricks, cement, and other masonry products.
- Arsenic and chromium from chemically treated lumber.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

SECTION 1: SAFETY

WARNING

For Your Own Safety Read Instruction Manual Before Operating This Equipment

The purpose of safety symbols is to attract your attention to possible hazardous conditions. This manual uses a series of symbols and signal words which are intended to convey the level of importance of the safety messages. The progression of symbols is described below. Remember that safety messages by themselves do not eliminate danger and are not a substitute for proper accident prevention measures.

 **DANGER** Indicates an imminently hazardous situation which, if not avoided, WILL result in death or serious injury.

 **WARNING** Indicates a potentially hazardous situation which, if not avoided, COULD result in death or serious injury.

 **CAUTION** Indicates a potentially hazardous situation which, if not avoided, MAY result in minor or moderate injury.

NOTICE This symbol is used to alert the user to useful information about proper operation of the equipment or property damage hazards.

WARNING

Safety Instructions For Metalworking Machines

1. **READ AND UNDERSTAND MACHINE OWNERS MANUAL FOR THE BAND SAW.**
2. **REMOVE ADJUSTING KEYS AND WRENCHES.** Form a habit of checking to see that keys and adjusting wrenches are removed from tool before turning on.
3. **KEEP WORK AREA CLEAN.** Cluttered areas and benches invite accidents.
4. **DO NOT USE IN DANGEROUS ENVIRONMENT.** DO NOT use power tools in damp or wet locations, or where any flammable or noxious fumes may exist. Keep work area well lighted.
5. **KEEP CHILDREN AND VISITORS AWAY.** All children and visitors should be kept at a safe distance from work area.
6. **MAKE WORKSHOP CHILD PROOF** with padlocks, master switches, or by removing starter keys.
7. **DO NOT FORCE TOOL.** It will do the job better and safer at the rate for which it was designed.
8. **USE RIGHT TOOL.** DO NOT force tool or attachment to do a job for which it was not designed.

WARNING

Safety Instructions For Metalworking Tools

9. **USE PROPER EXTENSION CORD.** Make sure your extension cord is in good condition. Conductor size should be in accordance with the chart below. The amperage rating should be listed on the motor or tool nameplate. An undersized cord will cause a drop in line voltage, resulting in power loss and overheating. Your extension cord must also contain a ground wire and plug pin. Always repair or replace extension cords if they become damaged.

Minimum Gauge for Extension Cords

AMP RATING	LENGTH		
	25ft	50ft	100ft
0-6	16	16	16
7-10	16	16	14
11-12	16	16	14
13-16	14	12	12
17-20	12	12	10
21-30	10	10	No

10. **WEAR PROPER APPAREL.** DO NOT wear loose clothing, gloves, neckties, rings, bracelets, or other jewelry which may get caught in moving parts. Non-slip footwear is recommended. Wear protective hair covering to contain long hair.
11. **ALWAYS USE SAFETY GLASSES.** Everyday eyeglasses only have impact resistant lenses, they are NOT safety glasses.
12. **SECURE WORK.** Use properly secured clamps or vises to hold work while performing the machining operation
13. **DO NOT OVER-REACH.** Keep proper footing and balance at all times.
14. **MAINTAIN TOOLS AND MACHINERY WITH CARE.** Keep tools sharp and clean for best and safest performance.
15. **USE RECOMMENDED ACCESSORIES.** Consult the owner's manual for recommended accessories. The use of improper accessories may cause risk of injury.

16. **REDUCE THE RISK OF UNINTENTIONAL STARTING.** On machines with magnetic contact starting switches there is a risk of starting if the machine is bumped or jarred. Always disconnect from power source before adjusting or servicing. Make sure switch is in OFF position before reconnecting.

17. **CHECK DAMAGED PARTS.** Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.

18. **NEVER LEAVE MACHINE RUNNING UNATTENDED. TURN POWER OFF.** DO NOT leave machine until it comes to a complete stop.

19. **SOME COOLANTS USED FOR MACHINING MAY CONTAIN HAZARDOUS CHEMICALS.** Read and understand all user information on the coolant container and protect yourself accordingly.

20. **NEVER OPERATE A MACHINE WHEN TIRED, OR UNDER THE INFLUENCE OF DRUGS OR ALCOHOL.** Full mental alertness is required at all times when running a machine.

CAUTION

No list of safety guidelines can be complete. Every shop environment is different. Always consider safety first, as it applies to your individual working conditions. Use this and other machinery with caution and respect. Failure to do so could result in serious personal injury, damage to equipment or poor work results.

WARNING

Additional Safety for Bandsaws

- 1. DO NOT OPERATE WITH DULL OR BADLY WORN BLADES.** Dull blades require more demand on the motor and are less likely to cut precisely. Inspect blades before each use.
- 2. NEVER POSITION FINGERS OR THUMBS IN LINE WITH THE CUT.** Serious personal injury could occur.
- 3. DO NOT OPERATE THIS BANDSAW WITHOUT WHEEL GUARDS, PULLEY GUARDS, AND BLADE GUARDS IN PLACE.**
- 4. ALWAYS HAVE STOCK FIRMLY CLAMPED IN VICE BEFORE STARTING A CUT.**
- 5. LET THE MATERIAL COOL BEFORE HANDLING OR REMOVING FROM VISE.** Cut material is hot and can cause .
- 6. WHEN CUTTING MAGNESIUM NEVER USE SOLUBLE OILS OR EMULSIONS (OIL-WATER MIX).** Water will greatly intensify any accidental magnesium chip fire. See a coolant supplier for specific coolant recommendations when cutting magnesium.
- 7. STOP THE MACHINE BEFORE REMOVING THE WORKPIECE.**
- 8. MAKE ALL ADJUSTMENTS WITH THE POWER OFF.**
- 9. DISCONNECT THE MACHINE FROM THE POWER SOURCE BEFORE MAKING REPAIRS.**
- 10. ALL INSPECTIONS, ADJUSTMENTS, AND MAINTENANCE MUST BE DONE WITH THE POWER OFF** and the circuit breaker shut off. Wait for all moving parts to come to a complete stop.
- 11. MAKE SURE BLADE SPEED IS SET CORRECTLY FOR THE MATERIAL BEING CUT.**
- 12. RECHECK BLADE TENSION AFTER INITIAL CUT WHEN USING A NEW BLADE.**
- 13. IF AT ANY TIME YOU ARE EXPERIENCING DIFFICULTIES PERFORMING THE INTENDED OPERATION, STOP USING THE BANDSAW!** Then contact our service department or ask a qualified expert how the operation should be performed.
- 14. MAKE SURE BLADE IS PROPERLY TENSIONED BEFORE OPERATING MACHINE.**
- 15. HABITS – GOOD AND BAD – ARE HARD TO BREAK.** Develop good habits in your shop and safety will become second-nature to you.

WARNING

Like all power tools, there is danger associated with the Model G8692. Accidents are frequently caused by lack of familiarity or failure to pay attention. Use this tool with respect and caution to lessen the possibility of operator injury. If normal safety precautions are overlooked or ignored, serious personal injury may occur.

CAUTION

No list of safety guidelines can be complete. Every shop environment is different. Always consider safety first, as it applies to your individual working conditions. Use this and other machinery with caution and respect. Failure to do so could result in serious personal injury, damage to equipment, or poor work results.

SECTION 2: GENERAL INFORMATION

Commentary

Grizzly Industrial, Inc. is proud to offer the Model G8692 Portable Bandsaw and Stand. This bandsaw is part of Grizzly's growing family of fine metalworking machinery. When used according to the guidelines stated in this manual, you can expect years of trouble-free, enjoyable operation, and proof of Grizzly's commitment to customer satisfaction.

We are also pleased to provide this manual for the Model G8692 Portable Bandsaw. It was written to guide you through assembly, review safety considerations, and cover general operating procedures. It represents our latest effort to produce the best documentation possible.

If you have any comments or criticisms that you feel we should address in our next printing, please write to us at:

Grizzly Industrial, Inc.
% Technical Documentation
P.O. Box 2069
Bellingham, WA 98227

Most important, we stand behind our machines. We have excellent regional service departments at your disposal should the need arise.

If you have any service questions or parts requests, please call or write to us at the location listed below.

Grizzly Industrial, Inc
1203 Lycoming Mall Circle
Muncy, PA 17756
Phone:(570) 546-9663
Fax:(800) 438-5901
E-Mail: techsupport@grizzly.com
Web Site: <http://www.grizzly.com>

The specifications, drawings, and photographs illustrated in this manual represent the Model G8692 as supplied when the manual was prepared. However, owing to Grizzly's policy of continuous improvement, changes may be made at any time with no obligation on the part of Grizzly. For your convenience, we always keep current Grizzly manuals available on our website at www.grizzly.com. Any updates to your machine will be reflected in these manuals as soon as they are complete.

SECTION 3: CIRCUIT REQUIREMENTS

110V Single Phase

WARNING

Serious personal injury could occur if you connect your machine to the power source before you have completed the setup process. **DO NOT** connect the machine to the power source until instructed to do so.

Wiring

The Model G8692 is wired for 110V operation.

Amperage Draw

The Model G8692 has a 1 HP universal motor. The motor draws the following amps:

G8692 Motor.....12 ½ Amps

Circuit Breaker Requirements

Use the following circuit breaker with your Model G8692.

Circuit Breaker15 Amp

CAUTION

Be sure that your particular electrical configuration complies with local and state codes. The best way to ensure compliance is to check with your local municipality or a licensed electrician.

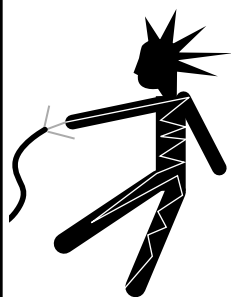

Your Shop Circuit Capacity

Always check to see if the wires in your circuit are capable of handling the amperage draw from your machine, as well as any other machines that could be operating on the same circuit. If you are unsure, consult a qualified electrician.

If the circuit breaker trips or the fuse blows regularly, your machine may be operating on a circuit that is close to its amperage draw capacity. However, if an unusual amperage draw does not exist and a power failure still occurs, refer to the troubleshooting section in this manual or contact a qualified electrician or our service department.

Grounding

	<h3> WARNING</h3> <p>DO NOT use the machine if it is not grounded. Electrocution or fire may result if this machine is not grounded correctly. Verify that any existing electrical outlet and circuit you intend to plug into is actually grounded.</p>
--	--

In the event of a malfunction or breakdown, grounding provides electric current a path of least resistance to reduce the risk of electric shock.

This tool is equipped with an electric cord with an equipment grounding conductor. Improper connections of the electrical-grounding conductor can result in the risk of electric shock. The conductor with green or green and yellow striped insulation is the electrical grounding conductor. If repair or replacement of the electric cord or plug is necessary, do not connect the equipment grounding conductor to a live terminal.

Extension Cords

If you find it necessary to use an extension cord with this machine:

- Only use a cord that is rated for standard service (Grade S).
- Only use a cord that contains a grounding prong.
- Use at least a 16 gauge cord if the cord is 50 feet long or less.
- Use at least a 14 gauge cord if the cord is between 50-100 feet.
- Always repair or replace cords when they become worn or damaged.

CAUTION

DO NOT remove ground prong from plug to fit into a two-pronged outlet! This machine must have a ground prong in the plug to help ensure that it is grounded. If the plug will not fit the outlet, have the proper outlet installed by a qualified electrician.

Check with a qualified electrician or one of our service personnel if the grounding instructions are not completely understood, or if you are in doubt as to whether the tool is properly grounded.

CAUTION

We have covered some basic electrical requirements for the safe operation of your bandsaw. These requirements are not necessarily comprehensive. You must be sure that your particular electrical configuration complies with local and state codes. Ensure compliance by checking with your local municipality or a licensed electrician.

SECTION 4: MACHINE FEATURES

SECTION 5: SET UP

Unpacking

The Model G8692 Portable Bandsaw was carefully packed at our warehouse. If you discover the machine is damaged after you have signed for delivery, and the truck and driver are gone, you will need to file a freight claim with the carrier. Save the containers and all packing materials for possible inspection by the carrier or its agent. Without the packing materials, filing a freight claim can be difficult. If you need assistance determining whether you need to file a freight claim, or with the procedure to file one, please contact our Customer Service.

When you are completely satisfied with the condition of your shipment, you should inventory its parts.

Piece Inventory

After all the parts have been removed from the crate, you should have:

1. Portable bandsaw (not shown)
2. Bandsaw bench stand with vise (not shown)
3. 4 Rubber work stand feet
4. Removable handle
5. 4 M6-1.0 x 25 mm Phillips head screws
6. 4 Washers 6mm
7. Hex keys 4,5,6 mm
8. Guide bar
9. 2 M5-.8 x 10mm flat-head Phillips screws
10. 2 Universal motor brushes

In the event that any non-proprietary parts are missing (e.g. nuts or washers), we would be glad to replace them, or for the sake of expediency, replacements can be obtained at your local hardware store.

Figure 2. Piece inventory from packing box.

Hardware Recognition Chart

USE THIS CHART TO MATCH UP
HARDWARE DURING THE ASSEMBLY
PROCESS!

MEASURE BOLT DIAMETER BY PLACING INSIDE CIRCLE

-  #10

-  5/16"
-  3/8"
-  7/16"
-  1/2"
-  5/8"

-  4mm
-  6mm
-  8mm
-  10mm
-  12mm
-  16mm

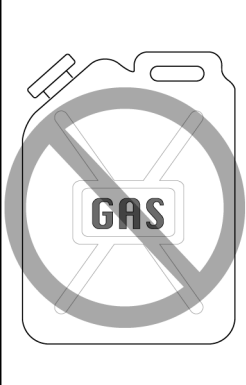

WASHERS ARE MEASURED BY THE INSIDE DIAMETER

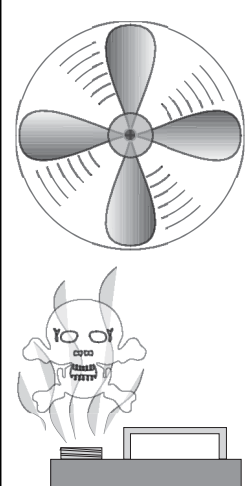

Clean Up

The unpainted surfaces are coated with a waxy oil to protect them from corrosion during shipment. Remove this protective coating with a solvent cleaner or citrus-based degreaser such as Grizzly's G7895 Degreaser. To clean thoroughly, some parts may need to be removed. **For optimum performance from your machine, make sure you clean all moving parts or sliding contact surfaces that are coated.** Avoid chlorine-based solvents as they may damage painted surfaces should they come in contact. Always follow the manufacturer's instructions when using any type of cleaning product.

	<p>! WARNING Gasoline and petroleum products have low flash points and could cause an explosion or fire if used to clean machinery. DO NOT use gasoline or petroleum products to clean the machinery.</p>
--	---

	<p>! WARNING Smoking near solvents could ignite an explosion or fire and cause serious injury. DO NOT smoke while using solvents.</p>
---	---

	<p>! CAUTION Many of the solvents commonly used to clean machinery can be toxic when inhaled or ingested. Lack of ventilation while using these solvents could cause serious personal health risks or fire. Take precautions from this hazard by only using cleaning solvents in a well ventilated area.</p>
---	---

Site Considerations

- 1. Workbench Load:** The Model G8692 weighs 38 lbs and has a footprint of 10" x 18- $\frac{1}{2}$ ". Most workbenches are suitable for your machine. If you are unsure that your workbench could support the weight of the machine, additional build up to support the machine may be required.
- 2. Working Clearances:** Consider existing and anticipated needs, size of material to be processed through each machine, and space for auxiliary stands, work tables or other machinery when establishing a location for your bandsaw.
- 3. Lighting and Outlets:** Lighting should be bright enough to eliminate shadow and prevent eye strain. Electrical circuits should be dedicated or large enough to handle amperage requirements. Outlets should be located near each machine so power or extension cords are clear of high-traffic areas. Observe local electrical codes for proper installation of new lighting, outlets, or circuits.

	<p>! CAUTION Unsupervised children and visitors inside your shop could cause serious personal injury to themselves. Lock all entrances to the shop when you are away and DO NOT allow unsupervised children or visitors in your shop at any time!</p>
--	---

Rubber Feet Installation

The work stand requires the installation of four rubber feet to provide a stable, slip resistant base.

To install the rubber feet to the stand:

1. Disconnect the bandsaw from the power source.
2. Turn the bandsaw stand on its side to access the threaded holes as shown in **Figure 3**.
3. Attach the rubber feet to the guide holes in the stand with the four Phillips head screws supplied with the saw.

Figure 3. Installing the rubber feet.

Portable Conversion

The Model G8692 can be easily converted to a portable handheld power tool.

To convert the bandsaw for handheld use:

1. Disconnect the bandsaw from the power source.
2. Remove the bandsaw from the work stand by removing the mounting brace cap screws shown in **Figure 4**.

Figure 4. Mounting brace cap screws.

3. Install the supplied handle to the bandsaw, using the cap screws removed in **step 2**.
4. Make sure all the fasteners are tight to eliminate movement and vibration.

Blade Guide Installation

To install the blade guide on your bandsaw.

1. Disconnect the bandsaw from the power source.
2. Position the blade guide over the threaded holes by the guide bearings.
3. Secure the blade guide in place with the supplied countersunk flat-head Phillips head screws as shown in **Figure 5**.

Figure 5. Attaching blade guide.

SECTION 6: OPERATIONS

Operation Safety

Your safety is important! Please follow the warnings below:

⚠ WARNING Damage to your eyes, lungs, and ears could result from failure to wear safety glasses, a dust mask, and hearing protection while using this machine.		
		

	⚠ WARNING Loose hair and clothing could get caught in machinery and cause serious personal injury. Keep loose clothing rolled up and long hair tied up and away from moving machinery.
---	--

NOTICE The following section was designed to give instructions on the basic operations of this machine. However, it is in no way comprehensive of all of the machine's applications. WE STRONGLY RECOMMEND that you read books, trade magazines, or get formal training to maximize the potential of your machine.

Machine Capacity

The Model G8692 is capable of cutting bar stock and steel sections to length in the horizontal position.

Maximum cutting capacity at 90°:

- G8692 (Rectangular)4¹/₂" x 4³/₄"
- G8692 (Round)4³/₄"

Switch Operation

Press the orange button (**Figure 6**), located beside the trigger, and make sure it returns to its original position when released.

Figure 6. Orange trigger button.

Blade Selection

Before operation, proper blade selection should be made for the type of material to be cut. The proper blade can be chosen, using a tooth per inch (tpi) rating system.

You must consider the material being cut and its diameter when choosing the correct blade. The Model G8692 comes with an 18 tpi blade which is installed.

Blade choice based on material:

- Soft material (aluminum, lead, rubber) use a 14 tpi blade.
- Hard material (steel, cast iron) use a 24 tpi blade.
- Soft and hard material use an 18 tpi blade.

Blade choice based on diameter:

- For thick material use a 14 tpi blade.
- For thin material use a 24 tpi blade.
- For thick or thin material use an 18 tpi blade.

Blade Speeds

When using your bandsaw, always change to the blade speed recommended for the material to be cut. The Model G8692 has speeds of 190 feet per minute and 285 feet per minute.

WARNING

Never change blade speeds while the motor is running. Damage to the machine or operator could result. Let the blade stop completely before changing speeds.

To change the blade speed on your bandsaw:

1. Make sure the blade has completely stopped running.
2. Make sure the saw blade is NOT engaged in the workpiece.
3. Check the material you are cutting and determine the proper blade speed setting.
4. Move the blade speed control switch (**Figure 7**) to *HI* or *LO* depending on the application.

Figure 7. HI/LO switch.

Blade Travel

The blade travel and wheel rotation on the Model G8692 are indicated by a direction arrow on the top cover, shown in **Figure 8**.

Figure 8. Blade direction.

WARNING

Always operate the bandsaw with the blade traveling in same direction as arrow. Damage to the machine, workpiece and blade will result if the blade is travelling in the opposite direction.

Starting Bandsaw

WARNING

Never operate the bandsaw without the proper blade guards and guides in place. Unprotected or unguided blades can cause injury to the operator and damage the machine or workpiece.

To start a cutting operation on the bandsaw:

1. Make sure all guards and blade guides are in place and secure.
2. Make sure the blade is not in contact with the material.
3. Clamp the material securely in the vise if you are using the stand.
4. Connect the bandsaw to the power source.
5. Press in the orange thumb button and pull the trigger to start the bandsaw.
6. Begin the cut by slowly letting the head down onto the workpiece. **DO NOT DROP OR FORCE BLADE THROUGH THE MATERIAL.**
7. When the cut has been completed, release the trigger and let the saw come to a complete stop before removing the workpiece from the vise.

WARNING

NEVER place fingers or hands in the line of cut. In the event that something unexpected happens, your hands or fingers may be pulled into the blade. Failure to follow these warnings may result in serious personal injury!

Blade Changes

To remove the blade:

1. Unplug the bandsaw from the power source!
2. Remove the bandsaw from the work stand.
3. Release tension on the blade by turning the tension control handle to “loose” (Figure 9).
4. Turn the bandsaw over and unscrew the Phillips head screws to remove the back cover.

Figure 9. Tension knob.

5. Remove the outer blade guide bearings by removing the cap screws shown in Figure 10.
6. Open the wheel covers and slide the blade off one wheel at a time. Use caution — the blade is sharp!

Figure 10. Blade guide bearings.

7. Place one end of the new blade over the drive pulley of the bandsaw (Figure 11).

Figure 11. Installing blade.

8. Feed the other end of the blade around the idle pulley and roll the blade onto the track.
9. Make sure the back of the blade is in contact with the guide bearings that support the back of the blade (Figure 12).

Figure 12. Rear blade guide bearing.

10. Secure the blade guide bearings removed in **step 5**.
11. Replace the back cover of the bandsaw.
12. Turn the blade tension lever back to *"TIGHT."*

Using Table Vise

To use the vise on your bandsaw table:

1. Disconnect the bandsaw from the power source.
2. Secure the bandsaw to the stand before inserting the material to cut. Combine the vise can operate in two different ways, depending on how the quick nut is positioned.

- When the quick nut pointer is positioned to the left, the vise jaw can slide rapidly up to the material (**Figure 13**).

Figure 13. Quick nut.

- When the quick nut pointer is positioned to the right the vise jaw will move when the crank is turned for fine adjustment and clamping force (**Figure 14**).

Figure 14. Vise nut.

3. When the vise has secured the workpiece properly, connect the machine to the power source.

SECTION 7: MAINTENANCE

Blade Breakage

Blade breakage is unavoidable, in some cases, as a natural result of the peculiar stresses placed on bandsaw blades. Avoidable breakage is most often the result of poor care or judgement on the part of the operator when mounting or adjusting the blade or support guides.

The most common causes of blade breakage are:

- Faulty alignment or adjustment of the guides
- Using a blade with a lumpy or improperly finished braze or weld
- Feeding the workpiece too fast
- Tooth dullness or absence of sufficient set
- Excessive or too little blade tension
- Running the bandsaw excessively when not resawing
- Not releasing blade tension after use

Miscellaneous

Always be aware of the condition of your machine. Routinely check for the following conditions and repair or replace as necessary:

- Loose mounting bolts
- Worn switch
- Worn or damaged blade
- Dirt or oil build up
- Worn or damaged support bearings or guide bearings

Cleaning

Cleaning your machine will extend its life and produce better results.

Important places of the Model G8692 to keep clean are the motor area, the blade, and the stand. Make sure these areas are free from oil and debris.

Storage

When storing the bandsaw for long periods of time, it is important to perform the following:

- Release tension on the blade.
- Store bandsaw in a safe dry place.

Lubrication

No lubrication is required for the Model G8692. All of the bearings in this machine have been lubricated with a sufficient amount of high grade lubricant. This lubricant will last for the life of the machine under normal operating conditions.

Motor Brushes

The Model G8692 comes with 2 extra motor brushes to help prolong the life of the universal motor.

To change the motor brushes:

1. Use a flat-head screw driver to remove the motor brush covers as shown in **Figure 15**.

Figure 15. Motor brush removal.

2. Remove the motor brushes.
3. Clean or replace the motor brushes and secure the covers.

GRIZZLY MODEL G8692 PORTABLE BANDSAW

Design Type Bench Model

Overall Dimensions:

Table 7¹/₈" x 5¹/₂"
Overall Height 14"
Overall Width 13"
Overall Depth including Fence 18¹/₂"
Shipping Weight 31 lbs.
Box Size 12" W x 23" L x 14¹/₂" H
Footprint 10" x 18¹/₂"

Cutting Capacity:

Left of Blade 4³/₄" Round, 4¹/₂" x 4³/₄" Rectangular
Cutting Angle 90°

Construction:

Table Sheet Metal
Wheels Rubber Coated Aluminum
Vise Sheet Metal
Wheel Covers Sheet Metal
Guides Ball Bearing
Main Body Aluminum & Plastic

Motor:

Type Universal Brush Type
Horsepower 1 HP
Bearings Shielded & Permanently Lubricated Ball
Phase / Cycle Single Phase / 60 HZ
Voltage 110V
Amps 2 Amps low, 3 Amps high
Switch Button Switch w/ Lock

Blades:

Blade Width 1¹/₂"
Blade Speed 190 & 262 FPM
Standard Blade Length 44⁷/₈"

Features:

..... Includes: Stand with locking vise
..... Double Insulated

Specifications, while deemed accurate, are not guaranteed.

WARRANTY AND RETURNS

Grizzly Industrial, Inc. warrants every product it sells for a period of **1 year** to the original purchaser from the date of purchase. This warranty does not apply to defects due directly or indirectly to misuse, abuse, negligence, accidents, repairs or alterations or lack of maintenance. This is Grizzly's sole written warranty and any and all warranties that may be implied by law, including any merchantability or fitness, for any particular purpose, are hereby limited to the duration of this written warranty. We do not warrant or represent that the merchandise complies with the provisions of any law or acts unless the manufacturer so warrants. In no event shall Grizzly's liability under this warranty exceed the purchase price paid for the product and any legal actions brought against Grizzly shall be tried in the State of Washington, County of Whatcom.

We shall in no event be liable for death, injuries to persons or property or for incidental, contingent, special, or consequential damages arising from the use of our products.

To take advantage of this warranty, contact us by mail or phone and give us all the details. We will then issue you a "Return Number," which must be clearly posted on the outside as well as the inside of the carton. We will not accept any item back without this number. Proof of purchase must accompany the merchandise.

The manufacturers reserve the right to change specifications at any time because they constantly strive to achieve better quality equipment. We make every effort to ensure that our products meet high quality and durability standards and we hope you never need to use this warranty.

Please feel free to write or call us if you have any questions about the machine or the manual.

Thank you again for your business and continued support. We hope to serve you again soon.
